SRI M. VEERAPPA MOILY.—Mr. Speaker Sir, this is a matter regarding the action on the part of the Forest Officials to evict about 122 landless persons from the Lambanidoddi, Harijandoddi Kuppadoddi of Hegnur in Harohalli group Panchayat of Krishnapur Taluk.

About 122 landless persons have been in actual possession and enjoyment of the above lands since more than 25 years. The lands had been surveyed in the year 1977 and mahazir was also prepared with regard to the possession of the above persons. In an average 122 persons are in possession of 1 to 3 acres. On 27-7-1985, R.F.O. of Sathnur Range and his staff came to the lands started destroying the standing crops and dig the pits for the purpose of planting for the afforestation. The poor people have nothing else to depend upon and they will become destitutes if they are dispossessed.

The forest officials have set on reckless acts of destroying standing crops and dispossess them. Unless they are stopped, poor occupants will suffer irreparable loss and hardship. The Hon'ble Minister of State for Forest may kindly direct the officials to stop the atrocities being committed on the poor occupants.

SRI B.A. JIVIJAYA (Minister for Forest).—Mr. Speaker Sir, Sri Veerappa Moily has alleged that the Forest departmental officials have started to destroy the standing crop for taking up planting in the lands under actual possession and enjoyment of about 122 persons in Limbani Doddi, Harijan Doddi and Kuppe Doddi of Hegganur village in Kanakapura Taluk. He has requested that atrocities committed on the poor occupants be stopped.

The landless people of Limbani Doddi, Harijan Doddi and Kuppe Doddi consisting of about 122 members were granted land under non-alienation scheme at the rate of 2 acres per family inside the Chilangadi state forest long back. There are boundary stones to demarcate these areas.

".....Unfortunately these people have been extending the land under cultivation each year and during the last 3-4 years such encroachment have been taken up on a larger scale. During the current year the encroachment which has been taking place in the portion where good tree growth has come across has been sought to be stopped by digging boundary trenches. The boundary trench dug is far away from the actual areas which were granted. In the area between the boundary trench and where good tree growth has come across pitting and trenching has been taken up for taking up planting.

While on the one hand on 27-7-85 neither the Range Forest Officer nor his staff have visited these sites; on the other hand the peaceful enjoyment of these cultivators within the land granted to them is not disturbed. It is only in a portion of the encroached area where the encroachment has taken place during the last 3-4 years and where encroachment is sought to be extended by damaging the trees on the part of the forests that we have sought to intervene.

Incidentally the N-A holders have defaulted almost all the conditions of the grant. The area was granted to raise plantation under Kumri method which permits cultivation also. They have not raised any trees. They are to help the department in controlling forest fires and against forest offences. They are themselves the cause of many offences including sandal smuggling, poaching and forest fires."
